

MONTHLY REPORT OF RIVER AND FLOOD CONDITIONS

REPORT FOR:

MONTH

January

YEAR

2001

SIGNATURE

Michael Decker

In Charge of HSA

DATE

February 6, 2001

TO: Hydrometeorological Information Center, W/OH2
 NOAA / National Weather Service
 1325 East West Highway, Room 7230
 Silver Spring, MD 20910-3283

When no flooding occurs, include miscellaneous river conditions, such as significant rises, record low stages, ice conditions, snow cover, droughts, and hydrologic products issued (WSOM E-41).

☒ No flood stages were reached in this HSA for the month above.

Most areas in the San Angelo HSA received normal or above normal precipitation during the month of January, with amounts ranging from 1 to 3 inches. Abilene received 1.04 inches...or 0.04 inches above normal. San Angelo had 1.29 inches...or 0.49 inches above normal. The heaviest amounts occurred on the 10th and 28th. Amounts averaged around ½ inch fell on the 10th, and ranged between ½ and ¾ inch on the 28th. While this rainfall did not contribute to stream flow and reservoir capacity, it did help soil moisture. As of February 3, 2001, the Palmer Drought index is slightly wet over the Big Country, and near normal across the rest of the HSA.

Reservoir levels in the Concho Valley remain low. O. C. Fisher and Spence reservoirs remain nearly unchanged this month, at 8 percent and 17 percent of conservation capacity respectively. Twin Buttes reservoir is at 5 percent...1 percent higher than December. The threat of river flooding is low.

Rainfall reports across the HSA for January:

Abilene ASOS 1.04	Eldorado 12N 1.06	Menard 1.66	Sonora 1.33
Abilene #3 1.63	Ft Griffin 3.09	Oak Creek LK 1.45	Stamford 1.58
Albany 1.96	Ft McKavett 2.36	Ozona 2.10	Sterling City 1.30
Anson 1.53	Funk Ranch 1.32	Putnam 2.05	Taylor Ranch 2.06
Ballinger 1.24	Hamlin 1.75	Richland Spgs 1.90	Telegraph 2.10
